NFCRWD Internship Experiences and Opportunities

We are looking for motivated people who want to gain valuable experience in the environmental and natural resources field. We also have great opportunities for social media development, field technician, data entry and management, GIS and youth education minded folks. Interns for the NFCRWD are exposed to a wide variety of experiences and many opportunities to work with agency professionals in the field.

The ideal candidate is detail oriented and not afraid to take on challenges as presented. Due to the nature of the organization, an intern may be doing field work in the morning, a classroom presentation in the afternoon and assisting with program development at the end of the day. We’re a fast-paced team with a lot of work to do! If this sounds like you please apply!

Water Quality Monitoring

- In the field collection of water samples from lakes and streams throughout the District
- Assist with stream hydrology measurements
- GIS applications for mapping needs of the District
- Data entry for field notes, equipment inventories and maintenance
- Assist with presentations to Lake Associations and project partners

Education / Outreach & Planning

- Present at numerous youth education events and in-class teaching opportunities
- Develop educational & informational brochures, newsletters, presentations, posters
- Assist with adult education workshops related to natural resource topics
- This position also helps with various watershed activities as assigned
- Participate in the comprehensive water management planning process

Project Implementation & Inspection

- Work on projects implemented in the agricultural, shoreland and urban landscapes
- Work on conservation projects doing design, field work, activity coordination
- Work closely with landowners installing conservation projects
- Help with database entry, learn various processes related to drainage, watershed procedures & processes and regulatory procedures.
- Learn field inspection procedures
- Opportunities to earn field certifications.

Selected applicants are eligible to receive an hourly rate of $10-14 depending on qualification. Position start dates and work weeks will be determined on applicant availability. We are flexible for the needs of a working student.

These positions have a history of permanent placement and/or referrals to other agencies for placement. A great opportunity for anyone looking for entry into the field!
