Notice of Seasonal Internship

The North Fork Crow River Watershed District is seeking a temporary, seasonal intern to assist in lake and stream monitoring, public outreach and planning, project implementation and inspections, data entry and analysis as well as other activities within the North Fork Crow River Watershed District. This is a great opportunity for people interested in the environmental and water resources fields to gain valuable experience.

Responsibilities:

Water Quality Monitoring
- In the field collection of water samples from lakes and streams throughout the District
- Assist with stream hydrology measurements
- Data entry for field notes, equipment calibration and maintenance

Education / Outreach & Planning
- Present at youth education events and in-class teaching opportunities
- Assist with adult education workshops related to natural resource topics
- This position also helps with various watershed activities as assigned

Project Implementation & Inspection
- Work on projects implemented in the agricultural, shoreland and urban landscapes
- Work with landowners installing conservation projects and project inspections
- Learn various processes related to watershed procedures & processes and regulatory procedures.
- GIS applications for mapping needs of the District

Qualifications: (See full job Description)
Applicant must have a valid driver’s license, capable of lifting 70 pounds, possesses excellent written and verbal skills, and have experience with Microsoft Office Suite. Being able to learn quickly and able to work independently as well as with a team.
